Orm Technology	: Hibernate.
Tools:	: Spring Tool Suite , MySQL Workbench, Postman, Maven, Docker
Build	: Maven

Professional Summary

- Having around 1.6 years of experience in **JAVA/J2EE** Technologies in development of web based and enterprise applications.
- Experience in Business Applications, Web Component and Enterprise Application development.
- Good Implementation Knowledge in **Core Java, JSP, Servlets, & JDBC.**
- Having Good Implementation Knowledge in **JAVA/J2EE Design Patterns.**
- Having Good Implementation knowledge in **REST Web services.**
- Having Good Implementation Knowledge in **Spring CORE, MVC, JDBC, Spring BOOT**
- Comfortable working with tools like Spring Tolls (STS), MYSQL Workbench, Maven, and Postman

Career Path

- Working as a Developer in **Nivtech Solutions PVT LTD.**, Bhubaneswar from January 2024 to till date.

Job Profile

- Work Experience of 1.6 years in Java, J2EE/Oracle technologies.
- Experience of working in Web and Enterprise Projects.

Educational qualifications

- Bachelor in Computer Science from 2018 in the year 2022
- Completed Full Stack Java Development from JSpiders BTM branch, Bengaluru in 2023

Project Details

 # 1.   **Project: E-Commerce Web Application**
       Tech Stack: Java, Spring Boot, Spring MVC,Spring Security, Spring Data JPA, Thymeleaf, JavaMailSender, MySQL,, HTML, CSS, Bootstrap, JavaScript
       Tools: MySQL Workbench, IntelliJ IDEA, Postman

       Project Description:
       Developed a full-stack e-commerce platform that supports end-to-end shopping functionality including product browsing, customer registration, order management, and real-time

notifications. The system includes separate user and admin portals, dynamic product listings, and an integrated email notification system.

Key Deliverables:

- Designed and implemented **role-based authentication** for users and administrators using **Spring Security**, including password change and profile update functionality.
- Built **CRUD functionality** for products, categories, users, and orders using Spring Data JPA and MySQL.
- Created **responsive and dynamic front-end interfaces** using Thymeleaf templates integrated with Spring MVC.
- Enabled **product search and filtering features** based on category, name, and order Id.
- Developed **real-time email notifications** for order confirmations, cancellations, and status updates using JavaMailSender and dynamic HTML templates.
- Added support for **custom email parsing**, extracting email addresses from customer-entered text.
- Created a dedicated **admin dashboard** to manage inventory, view order histories, and update order statuses.
- Implemented **order tracking logic** allowing users to view the current status of their purchases.
- Applied MVC architecture and clean coding practices to ensure modular, maintainable code.
- Followed standard exception handling, form validation, and secure data flow from controller to repository.

Personal Attributes

Team Player, willing to learn new technologies, Detail-oriented, Positive attitude, Adaptability to changing environments, Comprehensive problem-solving abilities
